## **SpreadsheetGear Adds Microsoft Excel Compatible WPF and Silverlight Controls to the Leading .NET Spreadsheet Component**

LENEXA, KS, October 30th, 2012 - Today, SpreadsheetGear LLC announced the immediate availability of SpreadsheetGear 2012. SpreadsheetGear 2012 enables developers to easily add scalable [ASP.NET Excel Reporting](#), dynamic [Dashboards from Excel Charts and Ranges](#), powerful [Windows Forms, WPF and Silverlight Spreadsheet Controls](#), comprehensive [Excel Compatible Charting](#), the fastest and most complete [Excel Compatible Calculations](#) and [more](#).

“With SpreadsheetGear 2012 we have added some of the most frequently requested features including WPF and Silverlight controls, multithreaded recalc, 64 new Excel compatible functions, Windows 8 support, Windows Server 2012 support, Visual Studio 2012 support, improved memory efficiency and performance particularly in 64 bit applications, custom row and column header text and styling for XAML controls, save to XPS and [more](#),” said Joe Erickson, Founder and CEO, SpreadsheetGear LLC.

### **SpreadsheetGear and Silverlight: Performance and Excel Compatibility in the Browser**

SpreadsheetGear for Silverlight is built on the same high performance Excel compatible spreadsheet and charting engines as SpreadsheetGear for .NET, enabling developers to take their browser based applications beyond the limits of HTML and JavaScript.

### **Multithreaded Recalc: Easily Take Advantage of Multicore Processors**

SpreadsheetGear 2012 makes it possible for developers to take advantage of multicore processors without the complexity of multicore programming by efficiently breaking workbook calculations into tasks using the Microsoft .NET Framework Task Parallel Library APIs.
